

# HOW TO: GIVE ORAL MEDICATION

# Before administering oral medication:

1. Have the horse safely restrained
2. Have the correct medication and amount drawn up
3. Stand safely to the side of the horse

Step 1: Draw up the correct volume of medication

Step 2: Confirm location to administer medication

Step 3: Place syringe in the corner of mouth and administer the oral medication by aiming to the back of their mouth

Step 4: Hold their head up afterwards to stop medication coming out
